

GEM Multi-Purpose Kiosk

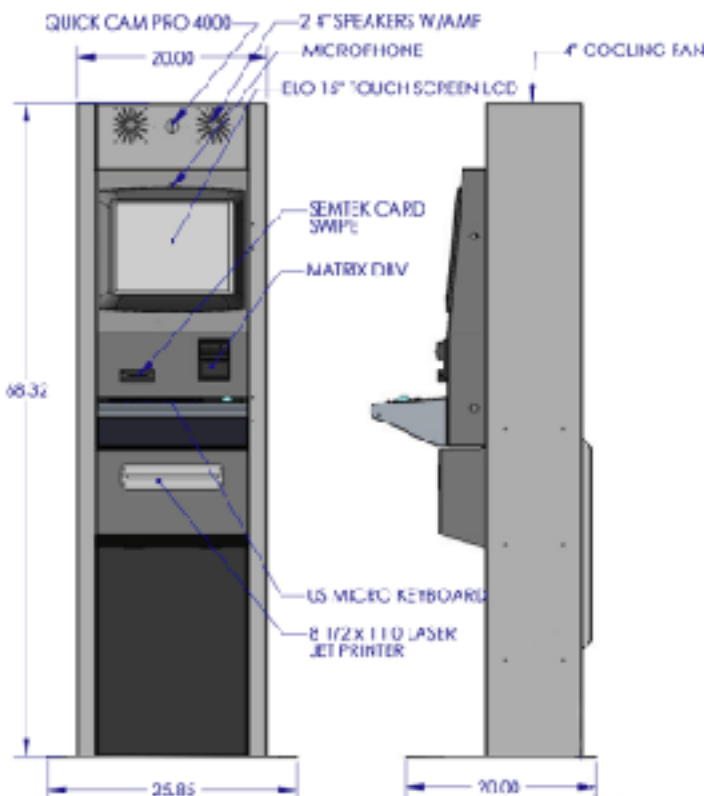

The GEM is a heavy duty, secure kiosk, designed for multiple point-of-use, information, or payment installations. The unit is designed to provide locked secure front access for limited access to the internal computer hardware components and secure money collection. The convenient rear access panel provides a separate chamber for printer access to reload paper.

Versatile and Affordable

The GEM provides a versatile cost-effective solution for almost any type of self service transaction. The GEM is priced for purchase in low volumes at normal high volume pricing. This unit is a perfect alternative to paying design charges or high pricing during design or testing phases. Imagine a positive ROI on your initial roll out!
